PROFESSIONAL SUMMARY

Business Analytics professional (MBA) with 4+ years of experience in application support and incident analysis at Cognizant, backed by hands-on skills in SQL, Power BI, DAX, Excel, foundational Python, NumPy and Pandas. Skilled at diagnosing root causes, building dashboards that surface business trends, and translating technical findings into clear, actionable updates for both technical and non-technical stakeholders. Applying that analytical foundation to Data Analyst roles.

CORE SKILLS

SQL: Joins, Subqueries, GROUP BY, CASE Statements, Window Functions, Aggregations, Data Filtering, Data Extraction, Data Analysis

Power BI & ETL: DAX, Data Modeling, Power Query, Dashboard Development, Data Modeling, KPI Visualization, Slicers, KPI Cards, Charts, ETL Pipelines

Python: Python Fundamentals, NumPy, Pandas, Data Analysis Fundamentals

Excel: Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Dashboard Development, KPI Tracking, Slicers, Charts

Analytical & Business: Root Cause Analysis, Ad Hoc Analysis, Data Cleaning, Business Reporting, Dashboard Development, Incident/Ticket Management, Stakeholder Communication, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Programmer Analyst | **Cognizant Technology Solutions** | *Jul 2022 – Present*

- Investigate and resolve 200+ application incidents/tickets by diagnosing root causes, validating reported issues, and coordinating fixes with development and infrastructure teams, consistently meeting SLA targets across P1–P4 severity levels.
- Validate fixes for every monthly application release, identifying 50+ defects prior to production deployment and ensuring changes met functional requirements before reaching business users.
- Partner with cross-functional development, QA, and business teams during production issues, delivering clear root-cause findings and status updates that keep stakeholders aligned and speed resolution.
- Serve as primary point of contact for business users on application issues, translating technical findings into plain-language explanations that build user confidence in resolution timelines.

ANALYTICS PROJECTS

Sales Trend & Performance Analysis | *SQL & Power BI*

- Queried and aggregated sales data using joins, GROUP BY, and CASE statements to conduct total sales and product performance analysis; visualized findings in an interactive Power BI dashboard (DAX measures, KPI cards, slicers) highlighting top-performing products and sales trends.

HR Attrition Analysis | *Excel, Power BI & SQL*

- Analyzed attrition patterns across ~1,400 employees using SQL aggregations and CASE statements, then built Excel and Power BI dashboards to visualize workforce demographics and attrition trends by department, identifying key drivers behind employee turnover.

Sales Performance Dashboard | *Excel*

- Built an interactive Excel dashboard (Pivot Tables, KPI cards, charts, slicers) tracking Total Sales, Average Sales, and Top-Performing Products from a retail sales dataset, surfacing revenue trends to support sales decision-making.

Stock Performance Dashboard | *Excel*

- Built an interactive Excel dashboard analyzing 3 years of stock price and trading-volume data to identify patterns in price movement over time.

COURSES & CERTIFICATIONS

Microsoft Excel Crash Course for Business Analytics — Udemy

SQL Server for Data Analysis — Alison

Power BI Certification Course — DataFlair

EDUCATION

MBA – Business Analytics | DY Patil University, Pune | 2025

B.Tech – Electronics & Telecommunication | VIIT Pune | 2022
