PROFESSIONAL SUMMARY

Business Analytics professional with an MBA and 4+ years of IT experience at Cognizant across data analysis, business reporting, application analytics, Power BI, SQL, and stakeholder collaboration. Skilled in translating business and technical requirements into analytical and business intelligence solutions, developing interactive Power BI dashboards, defining KPI metrics, performing ad hoc analysis, validating data, and translating complex findings into actionable business insights. Strong foundation in data modeling, data visualization, data quality, root-cause analysis, business intelligence, data storytelling, and cross-functional collaboration, with a focus on data-informed decision making and continuous process improvement.

CORE SKILLS

Business Intelligence & Analytics: Business Intelligence, Business Analysis, Data Analysis, Ad Hoc Analysis, Actionable Insights, KPI Analysis, Performance Metrics, Trend Analysis, Business Reporting, Data Storytelling

Power BI: Dashboard Development, Report Development, DAX, Data Modeling, Power Query, KPI Visualization, Interactive Reports, Data Visualization

SQL: Joins, Subqueries, GROUP BY, CASE Statements, Aggregations, Data Filtering, Data Extraction, Data Analysis

Excel: Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Dashboard Development, KPI Tracking, Data Analysis

Data & Professional: Data Validation, Data Quality, Requirements Analysis, Technical Documentation, Root-Cause Analysis, Problem Solving, Stakeholder Communication, Cross-Functional Collaboration, Testing & Validation, Process Improvement

PROFESSIONAL EXPERIENCE

Programmer Analyst | **Cognizant Technology Solutions** Jul 2022 – Present

- Analyze and resolve 200+ application incidents and business-impacting issues, using data and technical analysis to identify trends, root causes, risks, data inconsistencies, and resolution opportunities while consistently meeting SLA targets.
- Partner with business, development, QA, and infrastructure stakeholders to understand business and technical requirements, investigate challenges, validate solutions, and communicate actionable findings.
- Perform ad hoc data and operational analysis to support root-cause analysis, problem solving, performance monitoring, and data-informed decision making.
- Validate application changes and reporting-related outputs during monthly releases, identifying 50+ defects before production deployment and ensuring solutions meet functional and business requirements.
- Design and perform structured data validation, testing, and quality checks to ensure accurate and reliable analytical and application outputs.
- Perform UAT and post-release validation, communicate defects to relevant teams, and confirm successful resolution before business-user deployment.
- Translate complex technical findings into clear business insights and actionable recommendations for technical and non-technical stakeholders.

ANALYTICS PROJECTS

Sales Trend & Performance Analysis | *Excel, Power BI & SQL*

- Extracted and analyzed sales data using SQL joins, GROUP BY, CASE statements, aggregations, and data filtering to evaluate sales performance and product-level trends.
- Built an interactive Power BI and Excel dashboard using DAX measures, Pivot Tables, KPI cards, slicers, and data visualizations to communicate and track total sales, average sales, sales trends and identify top-performing products.

HR Attrition Analysis | *Excel, Power BI & SQL*

- Analyzed attrition data for approximately 1,400 employees, identifying workforce trends and potential turnover drivers through SQL analysis and Excel/Power BI dashboards.

Stock Performance Dashboard | *Excel*

- Built an interactive Excel dashboard analyzing 3 years of stock price and trading-volume data to identify historical trends and patterns in market performance.

COURSES & CERTIFICATIONS

Microsoft Excel Crash Course for Business Analytics — Udemy

SQL Server for Data Analysis — Alison

Power BI Certification Course — DataFlair

EDUCATION

MBA – Business Analytics | DY Patil University, Pune | 2025

B.Tech – Electronics & Telecommunication | VIIT Pune | 2022
